

FINAL PRESERVATION LOCK v1.0

ER-13 / SEC-CDP Coordinated Research | Three-file deposit set | 11 October 2026

Designation: AUTHOR-AUTHORIZED FROZEN RESEARCH RELEASE - INDEPENDENT REVIEW PENDING

Record ID: AEGIS-SOLIS-ER13-3FILE-FINAL-PRESERVATION-LOCK-v1.0-20261011

Author approval: "yes" in conversation, 2026-10-11 18:48:08 UTC. This is not a cryptographic signature or independent attestation.

Meaning: "FINAL" means final for this byte-specific preservation release, not final scientific conclusions, peer review, operational readiness, or safety certification.

Exact extraction reconciled

F-03 is now byte-for-byte identical to 01_CROSSWALK/Aegis_Solis_ER13_Evidence_Crosswalk_Draft_v0_6_4.pdf in F-01. An earlier separately supplied PDF had the same extracted text but different file bytes and is excluded from this lock. Only use the linked corrected version for this deposit.

Local checks: F-01 and F-02 ZIP CRC PASS; supplementary checksum pairs PASS; F-03 internal ZIP member comparison PASS. Remote downloads have not yet been checksum-verified.

Retained research and implementation limits

- Independent human statistical review and independent cryptographic/platform review: PENDING. No peer-review or endorsement claim.
- S01: ABSTRACT CONFIRMED (11 October 2026); full text NOT AUDITED.
- P-1/P-2: CLOSED BY AUTHOR DISPOSITION ONLY; full revision history and original proposer UNKNOWN. The v0.4 rejection of unsupported cutoffs and shell proposal is preserved.
- All eight pilot gates OPEN; recruitment and study execution NOT AUTHORIZED. Infrastructure Gates A-F OPEN; all 20 requirements NOT IMPLEMENTED / NOT TESTED.

Historical content retained, no silent rewrite

The research ZIP still contains internal "DRAFT / NOT FINAL / NOT LOCKED" language. The preservation-records ZIP retains older lock wording marking S01 and the provenance issues open; its included later author-approved v1.1 addendum provides the dated reconciliation. Those original bytes are not altered.

Integration boundary and publication checks

Aegis Mirror Engine: discovery/reference only; no source binding, calculation, regression preset or machine integration changes. Master Hash Manifest v17 unchanged; no v18.

This lock does not verify any upload. Record actual public links, release IDs/DOIs, live listing state and re-downloaded SHA-256 in a separate receipt for Internet Archive, Zenodo, GitHub, the Archive and PhilPapers. A submitted listing is not an accepted or publicly available one.

Future corrections require a dated sidecar or separately hashed successor, not in-place modifications of F-01 to F-03. This AI-assisted lock is not an independent scientific validation, security certification, signed timestamp or guarantee of immutable remote storage.
